

5 Often-forgotten Cleaning Tools

You Should Add To Your Cleaning Kit!

Cleaning

Toothbrush

Give your old toothbrush a second chance. Instead of tossing it, use its soft bristles to get into nooks and crannies.

Squeegee

If you want streak-free glass surfaces, you can trust the squeegee. Also, thanks to the rubber blade, you'll stop worrying about scratches.

Measuring Cup

Did you mess up a cleaning solution because you eyeballed the quantities? Keep a measuring cup at hand to get an exact mix.

Disposable

Gloves

Some cleaning jobs are too nasty for you to reuse rubber gloves. Disposable gloves are a great solution to avoid cross-contamination.

Butter Knife

It might not be time for a meal, but it doesn't mean your butter knife can't be handy. Use this kitchen utensil to scrape stuck-on grime off.
